To whom it may concern

Re: Confirmation that your approval according to Norsok M-650 validity has been expired and it is extended for a period of up to 3 months from the expiry date.

I am writing regarding your request for your existing approval to be extended, due to the current impact of COVID-19 on audit activities.

Based on the current restrictions on travel and social distancing requirements, we have agreed that your approval validity can be extended for an initial period of 3 months. You can present this letter to your customers or other third parties to provide them with evidence of the validity of your approval.

Based on the relevant numbers of satisfactory inspections performed in the last 5 years, during the period of extension, your company is accepted to continue producing products under the scope of approval, and subject to compliance with related Rules and survey requirements.

It will be necessary to undertake a renewal assessment as soon as possible. If the recertification is successfully completed during the extension period, an updated certificate will be issued. Validity of a QTR after renewal according to 6.2 starts from the date of signing the renewal QTR Front Page. Qualifying Company may also restrict the validity to less than 5 years.

Since the renewal cannot be completed prior to the expiring date this statement shall be put on the original QTR Front Page.

Organization name: Lloyd's Register EMEA -BA&IS
Scope of approval: NORSOK M-650 edition 4
Expiry date of current QTR's : 2nd September 2020
End of extension validity period: 31st December 2020

Yours sincerely,

Milena Matijasevic-Clarke
